

Product: GT SM200

Art. Nr.: KZGTRM140021

Product description: skid layer

APPLICATION

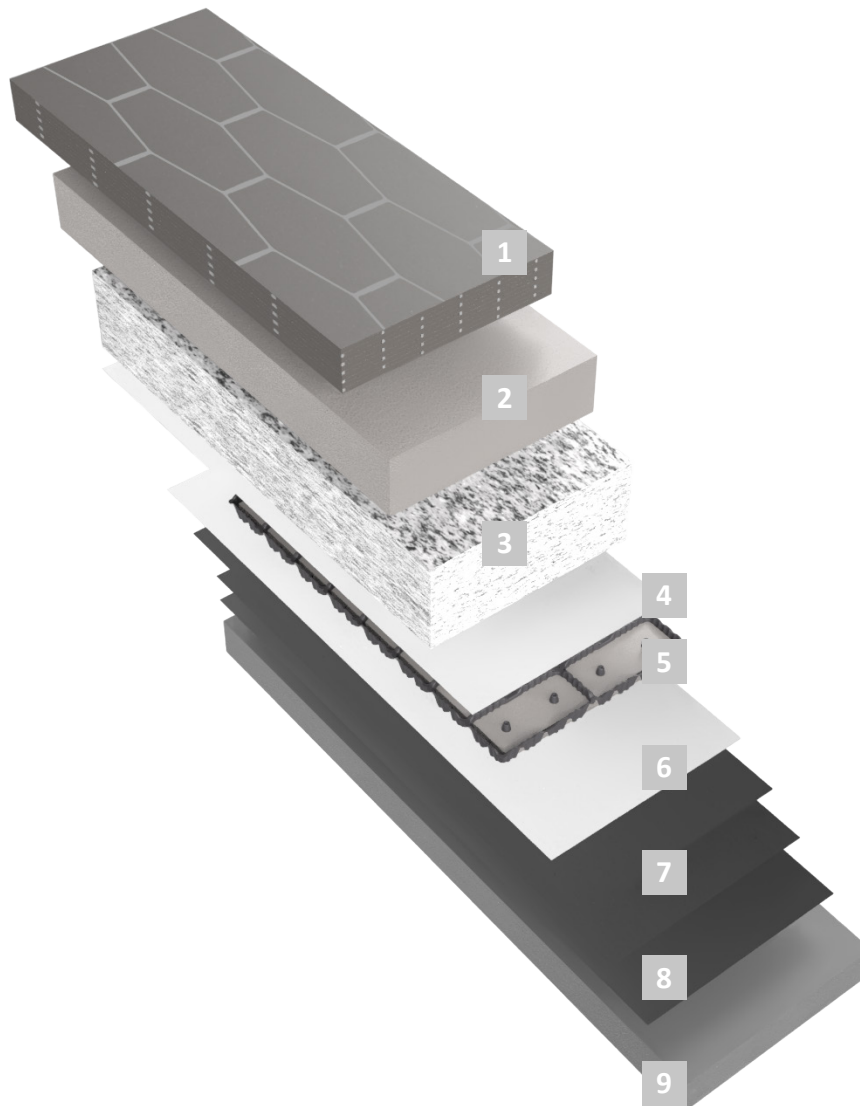

Technical layer for pedestrian- and car traffic roadways, applied in the build-up to protect the waterproofing membrane and keep the paved surface complete. Reducing damages caused by deformations due to breaking- and acceleration forces.

ADVANTAGES

- Low friction coefficient due to its material
- Available as a 4 m wide roll, individual roll width on request
- Skid layer for pedestrian- or traffic road build-ups
- Resistant against bitumen, oil, polystyrol, etc.
- Prevents plasticizers migration on PVC roofs

BUILD-UP

1. **Pavement**
2. **Bedding layer**
3. **Gravel base layer**
4. **Filter / Protection layer**
GT PM300
5. **Drainage layer filled with gravel**
GT Drain B60
6. **Filter / Protection layer**
GT PM300
7. **Double layer of skid layer**
GT SM200
8. **Waterproofing membrane**
9. **Roof construction**
